This will be shown if Java is already **installed**.

This will be shown if Java is **not installed**.

INSTALLING JAVA

For Linux:

Method 1

Install **openjdk** using the following command from your terminal

sudo apt-get install openjdk-7-jre

Method 2

Install Oracle JRE Using PPA. Open the terminal and run the following commands:

sudo add-apt-repository ppa:ferramroberto/java sudo apt-get update sudo apt-get install sun-java6-jre sun-java6-plugin sun-java6-fonts

Note:- Please use one of the above method install diffrent version of JRE.

After installing JRE using either Method 1 or Method 2,

Install Java for browser – firefox/chrome.

For running applets in your web browsers such as Mozilla Firefox or Google Chrome, you need to install **icedtea plugin**. Execute the following command from your terminal

Note: Java can also be installed through the URL <u>http://java.com/en/</u>

For Windows:

Install **Java SE Runtime Environment 7** through following URL: <u>http://www.java.com/en/download/</u>

Step1: Click on download button.

Step2: Save .exe file.
